

Work Experience

Superfine Studios

Position: Full Stack Web Developer
Tenure: April 2013 - Present

Responsibilities

I handle day to day operations, but I mainly work as a web developer. I've mostly worked with front-end development but I have had experience working with relational databases and some backend development with NodeJS and PHP.

Rovimat Construction

Position: IT & Web Consultant
Tenure: June 2010 - April 2015

Responsibilities

I provided IT consulting services to this small business without their own IT department. I manage their email, web services, and documents. I don't create the content in contracts but I beautify and create a consistent brand image in their company documents and marketing materials.

Crossmark

Position: Direct Marketing Specialist
Tenure: Aug. 2012 - Sept. 2014

Responsibilities

I helped assure brand success by skillfully demonstrating products to a wide range of consumers in their own grocery store. I had to think on my feet and remember products attributes for many different products since I rarely promoted the same brand and product combination twice.
